

In the Abstract

Please substitute the following amended Abstract for the Abstract as currently pending (deleted matter is shown by strikethrough and added matter is shown by underlining):

The invention relates to a method for measuring an optimally adapted intraocular lens for patients having a refractively modified cornea. The inventive method ~~is characterized by~~ includes the following steps: determining the formula-specific corneal refractive powers (~~$D_{12C_{preref}}$~~ , $D'_{C_{preref}}$) before the refractive intervention; determining the formula-specific corneal refractive powers (~~$D_{12C_{postref}}$~~ , $D'_{C_{postref}}$) after the refractive intervention, and; putting the formula-specific corneal refractive powers (~~$D_{12C_{preref}}$ and $D_{12C_{postref}}$ or $D'_{C_{preref}}$ and $D'_{C_{postref}}$~~) before and after the refractive intervention into the respective IOL formula.
